COURSEWORK

UNDERGRADUATE

Data Structures and algorithms
Database Management Systems
Computer Networks Operating Systems
Cloud Computing Object Oriented Programming Full Stack
development
Machine learning
Formal Languages and Automata
Cryptography and Security
Unix Tools and Scripting

SKILLS

TECHNICAL

Over 5000 lines:

- HTML
- CSS
- Core PHP
- PHP MVC System
- Laravel
- Javascript ES6+
- Typescript

Over 500 lines

- Bootstrap
- Tailwind CSS
- MySQL
- Laravel (Saas)

Familiar with

EXPERIENCE

BACKEND WEB DEVELOPER(intern)

04/2024-Past

Remonode Technologies, Nigeria (A Tech company)

- Implemented responsive design principles and ensured optimal user experience across devices
- Utilized Core PHP and PHP Laravel to build web applications, in order to improve speed, efficiency and code maintainability
- Designed and implemented database structures, optimizing data storage and retrieval
- Collaborated with clients to gather requirements and delivered tailored solutions
- Collaborated with cross-functional teams to meet project goals and deadlines

PROJECTS

CODEGIGS | Developer

Sept 2023 – present

CodeGIGs is a job listing website . Its platform where users can signup to post gigs, view posted gigs, signup and verify your email, forgot password functionality, manage gigs only posted by the logged in user. The database can store thousands of users.

Technologies used:

- Front-End: HTML, CSS, Bootstrap & Javascript ES6+
- Back-End: PHP & Laravel
- Database: MySQL
- Deployment: Cloud panel

FRAMES | Developer

July 2023 – present

This is an mvc framework I created to almost work like Laravel, it performs routing, modelling , viewing & controlling. It has default home page design, pagination (based on information from database and it comes with filters too, you can also edit the design of the pagination), Image editor, command line tool called skeleton (which can perform migrations, make controller and models and finally perform some db commands), a built-in login, signup and logout system , built in session classes which possess methods for easier session accessibility. It's not yet a composer package so it can't be downloaded but it's in my GitHub.

- Front-End: HTML,. CSS, Bootstrap & Javascript
- Backend: PHP MVC Framework
- Database: MySql
- Deployment: GitHub

JJ-CODES | Developer
