Twitter: [@fortunecodehub](#)

## COURSEWORK

### UNDERGRADUATE

Data Structures and algorithms  
Database Management Systems  
Computer Networks Operating Systems  
Cloud Computing Object Oriented Programming Full Stack development  
Machine learning  
Formal Languages and Automata  
Cryptography and Security  
Unix Tools and Scripting

## SKILLS

### TECHNICAL

Over 5000 lines:

- HTML
- CSS
- Core PHP
- PHP MVC System
- Laravel
- Javascript ES6+

Over 500 lines

- Bootstrap
- Tailwind CSS
- MySQL
- Laravel (SaaS)

Familiar with

- Version Control System (Git)

## EXPERIENCE

**FRONTEND WEB DEVELOPER** 11/2020-Current

D&B & COs, Nigeria

- Developed and maintained responsive web applications using HTML, CSS3, Bootstrap 5 and Javascript
- Implemented responsive design principles and ensured optimal user experience across devices
- Integrated and utilized Bootstrap framework for streamlined development

-----  
--  
**FRONTEND & BACKEND WEB DEVELOPER** 09/2021-Current

**Adrenaline Express**, Nigeria (An E-commerce Company)

- Implemented responsive design principles and ensured optimal user experience across devices
- Utilized Core PHP and PHP Laravel to build web applications, in order to improve speed, efficiency and code maintainability
- Designed and implemented database structures, optimizing data storage and retrieval
- Collaborated with clients to gather requirements and delivered tailored solutions
- Collaborated with cross-functional teams to meet project goals and deadlines

## PROJECTS

### CODEGIGS | Developer

Sept 2023 – present

CodeGIGs is a job listing website . Its platform where users can signup to post gigs, view posted gigs, signup and verify your email, forgot password functionality, manage gigs only posted by the logged in user. The database can store thousands of users.

Technologies used:

- Front-End: HTML, CSS, Bootstrap & Javascript ES6+
- Back-End: PHP & Laravel
- Database: MySQL
- Deployment: Cloud panel

### FRAMES | Developer

July 2023 – present

This is an mvc framework I created to almost work like Laravel, it performs routing, modelling, viewing & controlling. It has default home page design, pagination (based on information from database and it comes with

- GitHub
- VS Code
- PHP Storm
- PHPMyAdmin
- Laravel (Livewire, Jetstream)

#### Other Skills

- Team contributor
- Great communication skills
- Great team membership skills
- Problem solving skills

filters too, you can also edit the design of the pagination), Image editor, command line tool called skeleton (which can perform migrations, make controller and models and finally perform some db commands), a built-in login, signup and logout system, built in session classes which possess methods for easier session accessibility etc. It's not yet a composer package so it can't be downloaded but it's in my GitHub.

- Front-End: HTML, CSS, Bootstrap & Javascript
- Backend: PHP MVC Framework
- Database: MySQL
- Deployment: GitHub

#### PROINVEST | Developer

August 2023 – present

Proinvest provides investment plans that aim to bring profit to it's users. It has a panel for both users and admin. Users can login, signup, verify email and change password. It was created with an mvc framework i built from scratch. Front-End: HTML, CSS, Bootstrap & Javascript ES6+ Back-End: PHP & Frames

#### ACHIEVEMENTS

- |      |                                                                                                                                    |
|------|------------------------------------------------------------------------------------------------------------------------------------|
| 2021 | Successfully finished a web development course at <b>DMT Computers</b> , Nigeria with 2 <sup>nd</sup> position among my colleagues |
| 2023 | Solved 500+ questions across different coding platforms                                                                            |
| 2023 | Successfully created an mvc framework from scratch                                                                                 |
| 2023 | Successfully tested my framework with a complete project and it worked                                                             |
